EXPERIENCE

Creative Zone - 2019 - Current
Tutor
A community for programming I created, accommodated with discord channel, social media I've created, and a website that I developed to put my sources of education and covers Javascript programming language from basic into intermediate. Covers things like ES6, regex, DOM, functional programming, and a lot of my study sources.

EDUCATION

SELF TAUGHT

Face Recognition, Full Stack Social Media, GoogleSearchData Growth with Python, and other 20 projects, all of these have been achieved and published.

BSP 2018
IGCSE
I learnt and took IGCSE curriculum in just 5 months with no international curriculum experience, after I got accepted into UNNC, I invested myself into 10 months to reach the point of mastery.

SMAK 1 PENABUR 2016 - 2018

One of the most prestigious school in Indonesia, place where I gained a lot of connections until I decided to do full time code, as I realised I should start to code and have background in software.
